

Texas Risk and Authorization Management Program Certification

The information below is provided as a companion to the TX-RAMP Certification.

Cloud Service Name

Rustici Software LLC: Rustici Software SCORM Cloud, Rustici Engine, Managed Hosted, Rustici Content Controller

Cloud Service Provider URL

<https://rusticisoftware.com/>

Cloud Service Description (200 words or less)

Rustici Software's SCORM Cloud is a Software as a Service (SaaS) application that helps manage eLearning needs through a hosted platform. It allows users to deliver SCORM directly to learners using the SCORM Cloud interface or by integrating the SCORM Cloud API into their application.

Rustici Engine integrates directly into your application to manage import and launch of SCORM, xAPI, cmi5, LTI and AICC content. Inspire trust in your application by associating your LMS with the gold standard.

Rustici Engine powers hundreds of LMSs, learning systems and next-gen learning platforms, more than any software on the market.

Rustici Software's Content Controller is a platform for the centralized management and distribution of learning content to learning management systems (LMSs) and other learning applications. It solves the problem of making learning content available to learners across multiple LMSs while maintaining visibility and control over how the content is used and maintaining content in one location.

Certification Status

Level 2
